Memo

The financial condition of the D. T. Board of the Chetaldeng District and of the municipal Board of the Chetaldeng town as per sanctioned budgets for 1899-1900 is given below:—

	Chetaldeng D. T. Budget (old)	Chetaldeng Mcl Budget
(1) Opening balance	8010	-3785
(2) Estimated receipts	41980	8939
Total including balance	49990	12824
(3) Estimated expenditure	39455	12648
(4) Closing balance	10535	176

From the above that the balance under D. T. is a little over the minimum, presented by Govt while that under Municipal Budget is much below:-

Submitted 19/4/99

this country in search of employment & maintenance. They did not find work at rate remuneration & them were returning home when they fell ill on the road. They were suffering from diarrhea, dysentery & were very bad when they were admitted into the hospital. Four of the 6 children died & the two survivors are fast improving. The parents, are very much distressed at the loss of their children & though I promised to give them work suited to them they want to go to their home in the Kaap. They are under charge from the hospital yet, and as soon as they are quite well & able to return I shall give them the necessary help & send them away. They will kindly pay their fair before the Commissioner for this information.

Sir,

I have to state that when Iwan Dany the
Jamadar of the Mulki Panchayat Talk,
the Asst Surgeon Mulki sent me a
Voucher stating that a family of
7 members were admitted into the
Hospital, they were furnished people & washed
clothes - I was going to challan me but the
Inspector General of Police & came on the
following days and during the
following days came among them one
more female - They were a family
of Vaddars consisting of a man one
and 6 children & living by fishing in
the backwaters in the Belpanne river which
is their native place, they came to

Memo for orders.

The Dy. Comr. of Chitaldurg in submitting for sanction an estimate for Rs 7638 for the construction of a Lokatte near the 1st mile on the — Jogimatte Road near Chitaldurg observed as fol.

lows:—

"The Cattle of the Chitaldurg
"town formerly used to graze
"in certain Survey Numbers
"(both occupied & Kharab)
"near the bed of the Hirima
"nallenkere tank, which is
"the only important source
"of water supply to the town.
"They were also to go to that
"tank for drinking water.
"The water of the tank was

× No 744/717 of 14 March 1899.
Sanctioned in 21-1-99

"thereby rendered impure.
"Steps were therefore
"taken to prohibit grazing
"of cattle in the catchment-
"area and bed of the tank,
"and for this purpose the ac-
"cepted tenders were ac-
"-cepted after paying Rs
"5000 and odd for them
"as compensation. The cattle
"are put to great difficulty
"owing to want of drinking
"-ing water and hence the
"construction of the proposed
"tank has become abso-
"lutely necessary. It is
"calculated that it will
"provide an adequate
"supply of drinking water
"to the cattle.

"The plan & estimate
"prepared for the work

6 35

has been approved of by the Exe. Engineer. The work is of some magnitude Strictly speaking it is intended for the conservancy of the reservoir which is the source of water supply to the town, and therefore the Municipality have to undertake it. The work is situated beyond Municipal limits, and the Municipality already burdened with a heavy debt on account of water supply and Sanitary Works completed & under execution is not able to carry it out from its funds. I therefore beg Govt. will be pleased to allot funds for the work from Local Funds Revenue or other resources at their disposal.

2. (Copy of the above was forwarded to the Secy to Govt. D.C.W. for favour of his opinion as to whether the Work may not be treated as part of the Chitaldurg town water supply Project and dealt with accordingly.

×No 11951/Ld3697 of 22.4.99 (Srl 2)

3. The Chief Engineer forwarded Copy of a do Ltr from the Supdg Engineer, Sanitary Circle in which that Officer stated that apart from the expense of the Work, which is intended only for the use of a few Hundreds of cattle, the catchment available, 1 Square mile, will not yield 28 units with a rain fall of 20.48 inches, which was the average of the last 8 years in Chitaldurg and that the

×No 3040 of 13.6.99 (Srl 3)

4 utmost that can be expect
ed is 22 ~~et~~ inuts.

4. He added that as the Gollatte
was only for watering cattle,
the water might be supplied
by a pipe from Kimmana
valley here (the town Supply
Reservoir), and a few cisterns
placed where the Gollatte is
proposed, or in some more
convenient position in the track
usually taken by the cattle
on the way to the grazing
grounds.

5. As regards the question
whether this work may not
be treated as part of the
Chitaldurg town Water Supply
Project and dealt with ac-
cordingly, the Supt. Engineer
remarks that the objection is
that the D.C. brings to
notice that the Municipality

is already burdened with a heavy debt and apparently heads for a free fraud from Local Fund (mural or other Source. He also noticed that the work proposed was only for the use of cattle that graze to the South of the town, which was probably one half of the total number & that the remainder leave the Fort by the North gate where there is a perennial supply in the Nenda.

6. The above having been Communicated, that Officer (Ag. Com.) Stated that there were about 2562 Cattle in the town, that almost all of them leave the town invariably by the South gate for grazing purposes, & any

† No 474-75 of 7-7-99
2-91-99

No 284 of 24.10.99
272

5 8

ew leaving the Jail by the North Gate that the proposed Gokatte was intended exclusively for the watering of the large number of cattle that pass by the South Gate, which formerly used to go to Jimma Nadiadbere tank for drinking water, that cattle were now prohibited from going to that tank for taking water as the water in it was thereby rendered impure, that the watering of this large number of cattle cannot conveniently be done by means of a pipe from the tank as stated by the Supt. Engineer, Sanitary Deptt and that for these reasons the construction of a Gokatte was found indispensable. ⊗

7. While matters stood thus

⊗ In reporting the prospects of Seasons in the Ahmedabad District in January 1900, the Dy Comm'r requested Sanction for the construction of the Gokatte referred to & the Govt Sanctioned a lump sum of Rs 2000/- from L.F. Gl (Serial No 8 of L.B. File No 1 of 1899 for this & other relief works in the District

The then II Commissioner Mr Madhavrao Now recorded the following order

"I believe this formed the subject of representation at the Dasara assembly also How would we meet this cost if the Deccan is agreeable. I would sanction it from L.F. Gl."

This was submitted to the Deccan on on 18/11/99.

the residents of Chital during
Complained among other things
that their cattle which were
drinking water in the Khumin
Nallah were not
allowed to do so for the
past 3 or 4 years, that
the D.C. promised to
have a separate Gol Katta
built but that this was
not done & prayed that
a separate Gol Katta may
be ordered to be built.

This petition having been
forwarded to the D.C. Cont
for disposal by endorse-
ment, that Officer refers to
his letter No. 284/272 dt 24.10.99
and solicits a reconsi-
deration of the question.
He again begs to notice
that the work is intended
not for the use of a few

Petn No 1554 written which
received in this Office on 4.2.01

× in Petn No 1076 dt 14.2.01

hundreds of cattle as stated
by the Supt Engineer of Sanitary
Works, but for as many as
2562 according to the last
Agricultural Census, that
for this large number, it is
impossible to arrange to
supply drinking water by
pipes as suggested by Mr.
Lee, that the Honda on the
north referred to was
also not accessible for cattle
as it was reserved as a
drinking water reservoir.
Under these circumstances
the D.C. Com. repeat that
the project which is very
urgently required in the
interests of the large town

V

of Chitaldurg and the large
number of cattle belonging
it may be sanctioned
from Local Funds and
and adds that the Muni
cipality burdened as it
is, by the heavy debt in-
curred on account of the
Water Supply project
cannot afford to bear
the expenditure and
that no funds are avail
able from District Funds
also.

submitted for orders.

The financial condition of
the municipal and D. F. Boards
of Chitaldurg is given below:—

To

The Secretary to the
Government of Mysore
General Secretariat Department.

Sir,

I have the honor to submit herewith for the sanction of Government a scheme for Rs 7534 for the construction of a Gokatte across the pool in the Hirekere tank near the village of Kuntapura for the purpose of storing a sufficient quantity of water to last the cattle for drinking purposes of the villages of the tank and to enable cultivation. There is no other place to construct a Gokatte to prohibit grazing of cattle in the catchment area and bed of the tank, and for this purpose the ryots have agreed after paying Rs 5000/- and odd for them as compensation. The cattle are put to great difficulty owing to want of drinking water.

and hence the construction of the
borrowed tributes has become absolutely
necessary. It is calculated that it will
provide an adequate supply of drinking
water to the cattle.

3 The plan and estimate hereon
for the work has been obtained of
by the executive engineer. The work is
of some magnitude. Strictly speaking
it is intended for the construction of
the reservoir which is the source of
water supply to the town; and therefore
the municipality have to undertake it.
The work is situated beyond municipal
limits, and the municipality, already
burdened with a heavy debt on
account of water supply and drainage
works completed and under
execution, is not able to carry it out
from its funds. If therefore Government
will be pleased to allot funds for the
work from Famine Relief & Insurance
other resources at their disposal.

I have the honor to be
Sir
Your Most Obedient servant

MYSORE P. W. DEPARTMENT,

No. 3040

CENTRAL OFFICE,

Bangalore, 13th June 1899.

From

The Chief Engineer of Mysore

To

The Secretary to the Govt. of Mysore,
General & Revenue Depts:

SIR,

With reference to your No: 1195 / L.F 36-97 D/ 22nd April 1899, forwarding plan and estimate for constructing a Gokatte near the 14th mile on the Jogimatte Road, near Chitaldrug, for my opinion, as to whether the work may not be treated as part of the Chitaldrug town water supply project, I have the honor to forward the enclosed copy of docket No: 2438 / 293 of the 9th Instant, from the Superintending Engineer, Sanitary Circle, on the subject, and to inform you that, under the circumstances, the suggestion made in para 2 of that docket might be adopted.

2. The enclosures received with the docket under reference are returned.

I have the honor to be,
Sir,
Your most obedient Servant,

Captain R.E.

for Chief Engineer of Mysore

Ford to 583 (3/7)

1899

From The Superintending Engineer Sanitary Works.

To The Chief Engineer, of Mysore.

Dated Bangalore 9th
Despatched 10th } June 1899
Received

General No. 2438
No. 293

Enclosure No. 6*

Chief Engineer's No. 2072 dated 25th April 1899, forwarding proposal by Deputy Commissioner of Chitaldrug to construct a Gokatte at a cost of Rupees 7,638 for watering cattle

Referring to the above, has the honour to report that, apart from the expense of the work, which is intended only for the use of a few hundred heads of cattle, the catchment available, 1 Square mile, will not yield 28 units with a rainfall of 20.28 inches, which is the average of the last-

Central Jail Press, Bangalore.—21-9-98.—49,302.

past 4 years in Tarkwa. The ground that can be
expected is 2 acres.

2. As the Location is quite too far outside the
area which might be supplied by a pipe line from the
Fire (Town Supply) Reservoir, and as there is no other place
where the Location is surrounded, as it lies more to the
Eastward position of the track running N.E. to the
cattle on the way to their grazing grounds

3. As regards the enquiry whether the work done
not be treated as part of the Contribution to the Town
Supply Project and dealt with accordingly, the
decision is, that the Deputy Commissioner should
notice that the Municipality is already indebted with
a heavy debt and apparently needs the whole Special
Town Local Fund Council as other sums.

4. It must also be brought to notice that the road
proposed is only for the use of cattle that graze in
the South & the town, which probably is over half
of the total number. The remainder graze to the East
in the north side where Town is practically supplied
in the Mpanda.

5. The original letter with enclosures is returned.

I am,
Sir,
Your obedient Servant,

To.

The Secretary to the Govt.
of Mysore, Genl and
Rev. departments
Bangalore

Sir,

With reference to
proceedings of Government
no 4754-5 dated 7th July
1899 passing orders on
the proposal to construct
a Gokatte near the 1-SC.
mile of the Jogimatti Road
near Chitaldrug, I have
the honor to State that
there are about 2562
cattle

cattle in the town Almost-
all of them invariably leave
the town by the South gate
for grazing purposes.
Very few leave the fort
by the north gate. The
proposed Gokatte is in-
tended exclusively for the
watering of the large number
of cattle that pass by the
South gate, which formerly
used to go to Timmannanai-
kankeni tank for drinking
water. Cattle are now pro-
hibited from going to this
tank for taking water,
as by this means the
water in it will be ren-
dered impure. The watering
of this large number of
cattle cannot conveniently
be done by means of a
pipe

pipe from the tank as stated by the Superintending Engineer, Sanitary Department. Hence the construction of a Gokatte is found indispensible.

2 The work proposed is situated beyond municipal limits. The Municipality would nevertheless have gladly taken up the work, as the execution of it is calculated to improve the conservancy of the reservoir, which is the only source of water supply to the town. But as the Municipality has been already heavily burdened with the repayment of loans advanced on account of the water supply project under progress

moreiss and the sanitary
works carried on and
completed, it is not able
to take up the work. What
little that is left at the
disposal of the Municipality
after deducting the sums
payable towards the
repayment, with interest
of the loans above referred
to, is now being appro-
priated towards the sanitary
works in the town, the
necessity for which has
become more pressing,
having regard to the presence
of plague in Davangere and
other towns with which
Chitaldrug is in Commu-
nication

3 For these reasons
I beg once more to lay the
case before Government
and submit that they be
kindly

kindly moved to reconsider
the Subject and accord
sanction to the construc-
-tion of the Gokatte either
from Local Funds General
or from other resources
at their disposal.

4. The estimate and
the tracing &c. received
with the above are herewith
returned.

I have the honor to be
Sir,
Your most obedient Servant
[illegible]
Deputy Commissioner

(6) SLG L 174

No 453/432

Office of the Deputy
Commissioner,
Chitaldrug District
Dated 2d January 1900

To The Secretary to the Government of Mysore
General and Revenue Department
Bangalore

XX
Where are the letters of 17th Oct 99 Nov 20th Dec 7th Nov 30th Dec 14th 99 & 1/4/3/00

In continuation of my letter No 451/450 dated 31st Ultimo I have the honor to state that I conferred with the Executive Engineer re-garding the works that are in pro-gress and those that should be hereafter taken up in order to pro-vide work for the poorer classes during the next few months.

Papers returned from dept Branches & Circled Yellow Sect 24/3/1900

2. Throughout the District the collection of metal and gravel for

for the annual maintenance of roads had been stopped. This work gives employment to a large number of the poor of the District. I requested the Executive Engineer promised to start this work in communication with the Chief Engineer.

3. I have to provide work not only to the poor of the District but to large gangs of people coming from Bombay District in search of work in Marikanave for whom, as already stated in my Demi-official reports to the Councillor, no work can be found there. Four hundred of such men have returned from Marikanave and are now in Kolalkere, and as a

tentative

tentative measure, I have ordered that they should be employed in filling up the Fort Ditch at Holal here. I propose to employ them on the new Kagalpura tank as soon as sanction is received to an estimate which has been sent up to the Chief Engineer. I shall now deal in this, the requirements of the several Taluks and Sub-Taluks of the District

4 In Chitaldrug there the Kallahalli tank in the North east and in case of necessity which I expect will soon arise request permission to start the construction of Gokatte for which an estimate has been sent with this Office letter No $\frac{284}{272}$ dated 24th October 1899. The repairs of the Bhimasamudra

We received this letter in Protocol.

4642;
31/10/99.

2)
Put up 4/11

Bhimasamudra Channels will also be started if the levy of acreage contribution proposed in my letter no $\frac{394}{376}$ dated 5th Ultimo is sanctioned. These three works will meet all the requirements of the Taluq.

5. In Davangere and in the Harihar Sub-Taluk, it is the Southern part that is affected, as it is there that the crops have failed. The tract forms part of the basin of Shyagale halla, which takes its rise in the Northern part of the Holalkere Taluk and is joined by the Suleker-halla near Devarbelakere. The Dewan expressed a strong desire for the development of this valley, the extensive drainage of which is now going to waste. The

Kaffalgere

Kaçalgere Tank referred to in the second para of this letter is at the head of this valley, and the Tank proposed to be built at or near the junction of the two streams will be the principal Tank and a very important one If a portion of the earth work of this Tank which has to be built one way & the other is now started it will be inadequate work & the poor of this affected village both in Davangere and in the sub Taluk of Harihar. I find there is no other suitable work besides small local fund works which cannot last long. This order to find work for the people coming from the Bombay Districts, and this may be a very large numbers, I beg to propose the starting of the Avergola Tank proposed to be constructed four miles from Davangere

The

The Plans and Estimates for this work have already been submitted to Government.

6. In Jagalur, two tanks are in the hands of the Public Works Department, these and the Road work, which also gives a large quantity are quite enough to cope with any demand for labor that may arise, so also in Chellakere where the large tanks at Nirasabihalli, Parasurampur and Chikkamadure are likely to meet all requirements. In Molakalmuru, the Dosareddihalli tank may be started for which the Executive Engineer told me that the inhabitants of the Rayadroog Taluk who first raised objections, are now very eager. In Hiriyur, the Marikanave project finds work for all skilled labor; but as the Crops in the Taluk have been tolerably fair, there is no necessity to provide unskilled work beyond the collection of metal and gravel for the annual maintenance of roads. In Holalkere, the Kagalgere tank [illegible]

[illegible]

in the second para above is enough for the present

7 In the Hosadroog Sub Taluk, the cutcherry have received applications and it is here that there is a demand for work on a somewhat large scale The earth work to be done to the Devapur tank referred to in my letter no $\frac{444}{424}$ dated 20th Ultimo and the repairs of the two Yanakal tanks for which estimates have been sent up will give work on one side and the Bagur tank for whom also an estimate has been sent will give it on the other These are enough for the present If more work is wanted the metalling of the road from the Hosadroog Road Railway station to Hosadroog and on to Marikanave may be started; but there is yet now no necessity for it

Patrick 6

8.

8. It will be seen that, with the exception of the Anegola and Devarabelakere Tanks, the works enumerated above are not of very great magnitude and would have been undertaken even in ordinary season. The construction of the two large tanks forms part of a scheme for affording irrigation facilities to the Davangere Taluk, which has met with approval, and seems that no other suitable work can be found there and that it is here that the necessity for work is more urgent than elsewhere, I trust Government will sanction the starting of these works.

I have &c.

short of funds to undertake the work at their own cost.

Order thereon:—

The attention of the President is drawn to para 4 of Proceedings No 6591.600 L&L 5' dated 10th September 1891, wherein it is distinctly laid down that all Municipal works must be executed from municipal funds and that grants from L.F. General would be made for such works as are useful to the general public. In the present case, there is nothing to show that the work is of such a general nature as to require any allotments from L.F. General.
